

7 JUL 1978

MEMORANDUM FOR: Deputy Director for National Foreign Assessment
FROM: Director of Central Intelligence
SUBJECT: Material for 26 July SCC Meeting

I see that there is a 26 July SCC meeting on oil production technology export controls. I'd really appreciate your reviewing the paper that was put together in a hurry at NSC request and attempting to come up with a more precise response as to the impact on the Soviets of denial of different categories of oil field equipment and the probable time it would take for them to find alternative sources.
